Hello,

My name is Fabian Urbina. I am writing this as a concerned citizen. I am very troubled by the lack of representation of the Latino community on the Commission. As you know, it is important to have a diverse group of individuals representing sexual identity, political views, and ethnic backgrounds. Latinos is the largest growing group in California and without Latino representation on the Commission, I know the Latino community will be severely hurt and under-represented in future state legislative and congressional districts.

I strongly urge you to select at a MINIMUM four Latinos to be on the Commission. It is key to California's largest growing ethnic group to be represented in this process. It is also important to represent the rural Northern California counties as a whole. Californians in those counties are often overlooked, and people of color living in those counties are even more overlooked.

Again, I strongly urge you to select at a MINIMUM four Latino representatives to the Commission.
