How could there not be a single Latino represented on the redistricting commission in this state? Millions of Latinos and not a single person? There is clearly bias. I personally know hundreds of qualified Latinos who can be analytical and create these maps. California has a wealth of Latinos who are lawyers, judges, architects, engineers, educators, accountants, entrepreneurs, doctors, therapist, and so many other qualified professionals. If you can't find a qualified Latino in this state, your system is flawed. This is a disgrace and the results will negatively impact the future of this state and the Latino community negatively. The state now needs a new panel that represents Latinos.

This is outrages!
